

EDUCATION

W. P. Carey School of Business at Arizona State University	Aug 2024 – Dec 2025
Master of Science in Business Analytics	Tempe, Arizona
Relevant Coursework: AI and Data Analytics, Descriptive and Predictive Analytics, Analytics of Unstructured Data, Machine Learning in Business, Advance Marketing Analytics, Enterprise Data Analytics	
Gujarat Technological University	July 2016 – July 2020
Bachelor of Science in Electronics and Communication	Ahmedabad, Gujarat

PROFESSIONAL EXPERIENCE

Applied Analyst (Capstone + Internship)	Aug 2025 – Current
DST Investment Advisors	Scottsdale, Arizona
- Built Playwright and Python-based scrapers to extract attorney lead data from multiple government websites, structuring results into clean Excel spreadsheets for lead generation. - Reduced manual research time significantly and ensured consistent, on-time data delivery by automating the entire extraction workflow end-to-end.	
ERP Data Assistant	Jan 2024 – May 2024
Hexaplast Industries	Ahmedabad, Gujarat
- Worked as a junior data-handling assistant, structuring both unstructured and structured data — office documents, sales contracts, spreadsheets, and real-time order data — across departments to support ERP system implementation and reporting. - Used SQL, Python, and Excel to manage, clean, and structure this data efficiently.	
Business Operations Trainee	May 2023 – Dec 2023
Hexaplast Industries	City, State
Gained cross-departmental, hands-on training — across sales, inventory, machine building, and electronics — to understand end-to-end company operations before specializing in analytics.	

PROJECT EXPERIENCE

Hospital Readmission of Diabetic Patients, ASU Data Science Lab	Aug 2025 – Dec 2025
- Analyzed a 101,766-record diabetic patient dataset from 130 U.S. hospitals to predict 30-day readmission risk, building and evaluating Logistic Regression, Random Forest, and XGBoost models that achieved 0.672 AUC-ROC. - Validated robustness via 5-fold stratified cross-validation and mitigated bias by auditing 50 data fields and excluding race/gender from model inputs.	
Diabetes Readmission Risk Assistant (RAG Application)	Jan 2026 – Feb 2026
- Extended the readmission model above into a live application that answers patient care questions, designing a retrieval-augmented generation pipeline over 46 clinical guideline documents (ADA, WHO, CDC, Mayo Clinic) chunked into 2,456 embeddings. - Integrated the live XGBoost risk score with an LLM (Llama-3.1-8B) via Streamlit to deliver personalized, citation-backed care recommendations.	
Inventory Optimization Using Computer Vision	Mar 2025 – May 2025
- Partnered with ASU's Pitchforks dining hall to automate a 6–8 hour manual inventory count, fine-tuning a YOLOv8 object-detection model via transfer learning on a self-collected 428-image dataset (96.8% precision, 0.973 mAP@0.5). - Diagnosed a multi-object detection failure mode and resolved it using synthetic data augmentation, limiting the mAP@0.5 drop to just 0.011.	
Fast Fashion vs. Slow Fashion (Yelp Review Analysis)	Jan 2025 – Mar 2025
- Compared customer sentiment toward fast fashion and slow fashion retailers by cleaning and joining 5 raw Yelp datasets (~10M records) into a 65,729-review, 3,100-business dataset spanning 11 U.S. metros. - Ran dual sentiment pipelines (VADER + DistilBERT) and applied TF-IDF/LDA topic modeling across 6 complaint categories to inform business strategy recommendations.	

Reviewer Social Network Analysis

Feb 2026 – Apr 2026

- Investigated whether Yelp's "Elite" reviewer status reflects genuine social influence by constructing a social graph of 46,236 reviewers and 135,151 friendships.
- Found that Veteran Elite reviewers were ~44x more socially connected than single-review users, using k-means geospatial clustering across 11 U.S. metros.

Housing Affordability and Eviction Trends (Displaced Voices), ASU Data Science Lab

Jan 2025 – May 2025

- Collaborated with ASU's Data Science Lab to study eviction trends across communities, performing validation checks on eviction datasets to ensure a high-integrity analytical foundation.
- Set research goals and visualized financial challenges to advocate for vulnerable populations through actionable data insights.

SKILLS & ACTIVITIES

- **Programming & Web:** Python, SQL, HTML, CSS, JavaScript
- **Analytics & BI Tools:** Excel, Power BI, Tableau
- **Machine Learning & Statistics:** Statistical Analysis, scikit-learn, XGBoost, Random Forest, Logistic Regression
- **AI & Generative AI:** Retrieval-Augmented Generation (RAG), LLMs (Llama-3.1-8B), Sentence-Transformers, ChromaDB, Streamlit
- **Deep Learning & Computer Vision:** YOLOv8, OpenCV, FastSAM, DistilBERT, Transfer Learning
- **NLP & Automation:** Sentiment Analysis (VADER), Topic Modeling (TF-IDF/LDA), NetworkX (Graph Analysis), Geospatial Clustering, Playwright (Web Automation)
